Did you know that **EASTER EGGS** are not always used on Easter Sundays? they also appear in computers. Easter Eggs *actually appear in the programming world*. That's right! **Programming**. It is an inside / hidden message on computer programming.

And to let you know that you're seeing **Easter eggs almost every day** of your life since they have been made by programmers, your Internet browsers like Mozilla Firefox and the most famous Chrome and of course Safari does have Easter eggs. *They're as real as the real colourful eggs we hunt every Easter Sunday.*

And let's not stop there, let's go to something obvious and we use every day and very infamous technology which is **our search engines!** Yes, that's right. It's right under our noses that **Google, Bing, Yahoo** and etc., are somehow playing with us with their trick. *In retrospect, that is what Easter Eggs are for programmers.*

In addition to that, since **animation** includes computers the bright idea from one of the famous mouse in the world (*Mickey Mouse*) does have Easter eggs. If you like watching animated movies like **DISNEY Pixar**, you've been seeing a lot of Easter eggs all year round.

So what's the purpose of all these? Hmm. It's all about; the idea of letting the hackers or viewers know **who are the makers or programmers** are.

Happy Easter Egg Hunting {!firstname\_fix}!
